About

2D/3D Motion Designer with over 5 years of experience creating animated content for brands, products, and digital platforms. Passionate about combining design and technology to produce engaging visual storytelling.

Experienced in producing explainer animations, marketing videos, event teasers, and social media content. With a strong technical background in both motion design and software development, delivering efficient production workflows and technically advanced visuals across every project.

Experience

● Motion Designer

Since September 2020 **Freelance** Paris

- Designed and animated **2D and 3D motion design** content for various clients: explainer videos, marketing animations, and social media assets.
- Created **animated graphic designs, vector illustrations, 3D models**, and product visuals.
- Delivered promotional videos, **event teasers**, and **brand video content**.
- Managed production workflows: **storyboard, art direction, compositing, animation, post-production**.
- Used advanced **After Effects, Premiere Pro, Cinema 4D, Blender**, and **Photoshop**.

● Motion Designer

From January 2022 to January 2023 **Storyfox** Paris

- Developed and produced **customisable animation templates** for a video-creation SaaS platform.
- Automated video content creation via **dynamic After Effects compositions** (linked to variable data).
- Collaborated with marketing and product teams to create educational and commercial videos for multiple formats (social, corporate, onboarding).
- Integrated **brand content** standards, **UX motion**, and **kinetic typography**.

● Research Engineer

From January 2018 to August 2020

Alten (Missions chez Softbank Robotics & Thalès) Boulogne-Billancourt

- Designed and developed **interactive user interfaces** in Python for industrial and robotics data analysis.
- Performed signal and image processing for embedded systems, including analysis of **visual and LIDAR sensors**.
- Delivered interdisciplinary work across **software technology, data visualisation**, and **user experience (UI/UX)**.

Education

● Engineer in Image Processing

From 2013 to 2017 **Télécom SudParis** Evry

Courses: signal processing, image processing, morphological image analysis, multimedia indexing, virtual and augmented reality, and machine learning.

English

Level C1

- TOEIC 955/990

French

Native

Strengths

Technical skills

- Created explainer videos and social media content
- Animated logos, typography, and brand identities
- Created storyboards, animatics, and animation templates
- Integrated motion design into UI/UX interfaces and digital products
- Modeled, textured, and rendered 3D assets (Blender, Cinema 4D, Octane)
- Led art direction and developed cohesive visual identities
- Optimised motion design production workflows

Soft skills

- Autonomous and rigorous
- Creative and curious
- Responsive and resilient
- Analytical and synthetic thinking
- Attention to detail and visual storytelling

Skills & Tools

Motion Design & Video

- 2D/3D animation
- Storyboard / Art direction
- Compositing / Editing / Post-production
- Logo animation / Kinetic typography
- Explainer, advertising, and event video
- Motion integration in UI/UX

Tools & Software

- **Adobe Creative Cloud:** After Effects, Premiere Pro, Photoshop, Illustrator, Audition
- **3D:** Cinema 4D, Blender, Houdini, Substance Painter, Octane Render
- **Real-time / Engines:** Unreal Engine, Unity
- **Audio / Sound:** FL Studio

Development & Visual Techniques

- Python, C/C++, HTML, CSS, Javascript
- Three.js, OpenFrameworks, OpenCV
- Interactive prototyping, HMI, Git
